

## IncrediMail 2.0 New Installation

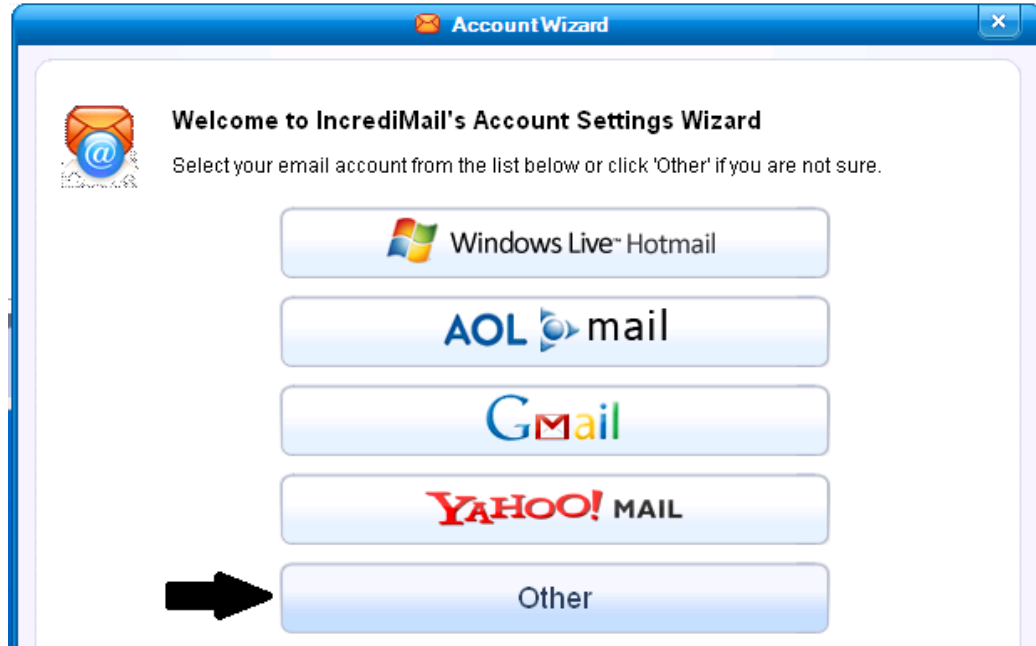

1. If the add email account wizard does not come up automatically **click on Tools** from the top and **select Email Accounts...**

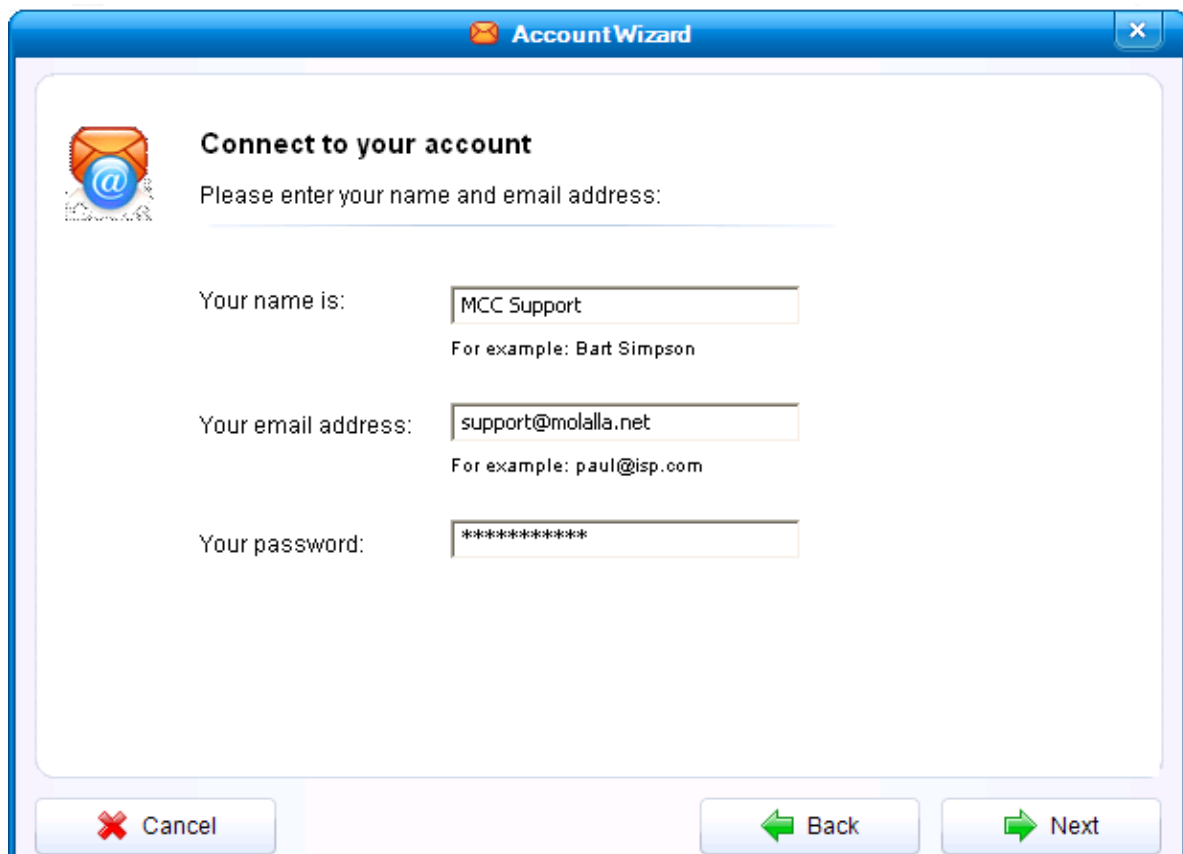

2. **Click on Add**

3. Click on Other

4. Enter Your Name, Your email address, and Your password in the corresponding fields and click on Next

5. Incoming mail server should be **pop3.molalla.net\***  
Outgoing mail server should be **smtp.molalla.net\***  
\* If it does not have the pop3. and smtp. in-front of molalla.net please add them as you see in the screenshot below then **Click on Next**

My incoming mail server type is: POP3

**Please verify that this is your incoming (POP3) mail server.**

Incoming mail server: pop3.molalla.net

**Please verify that this is your outgoing (SMTP) mail server.**

Outgoing mail server: smtp.molalla.net

Cancel Back Next

6. Click on Skip

**Account Settings:**

 

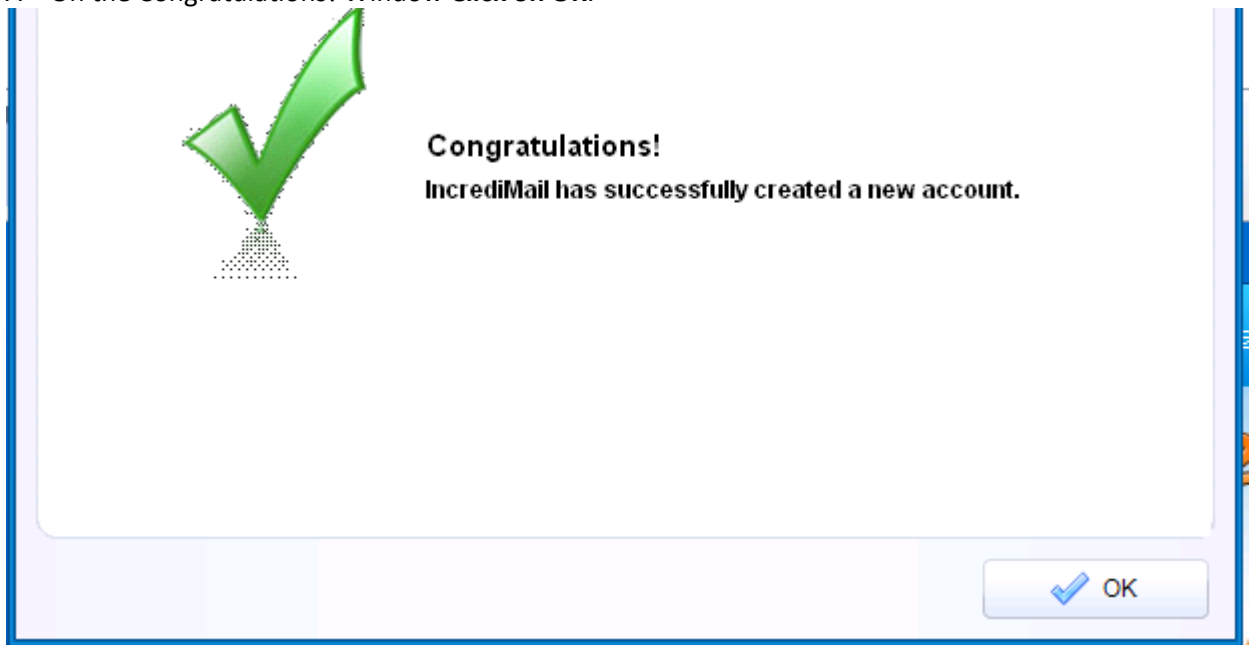

**Hmm... Something went wrong...**

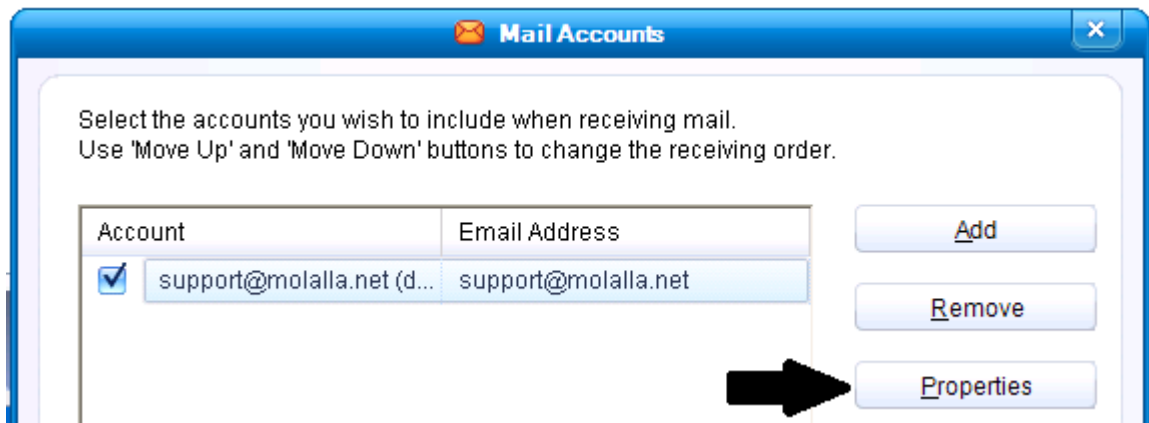

Molalla.net said:  
"There was a problem connecting to your account.  
Please make sure your email address is typed correctly."

Skip Try again

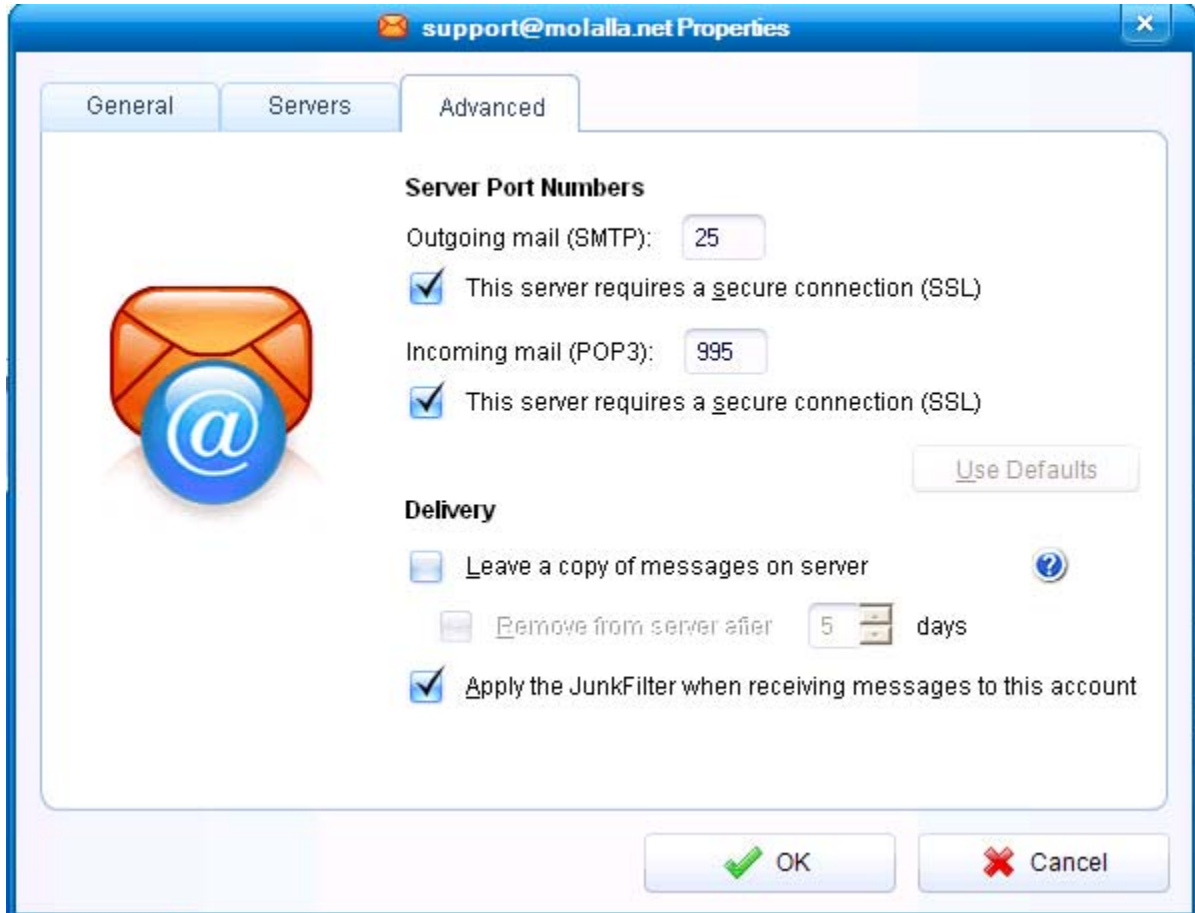

7. On the Congratulations! Window **Click on OK.**

8. **Click on Properties**

9. **Select the Advanced Tab** and make the following changes  
**Place a check next to “This server requires a secure connection (SSL)” for both Outgoing and Incoming mail.**  
**Press OK** to close the Properties Window  
**Press Close** to close the Mail Accounts Window

You are now able to Send and receive emails with your IncrediMail
