

Features and Benefits

1. What is MCC's X-FON ?

- MCC's **X-FON** is phone and broadband service designed to provide clear phone and Internet access with maximum connection speeds.
- Data is delivered digitally to your home by hair-thin glass fibers.
- X-FON** provides the fastest internet speeds available, and a virtually unlimited capacity to carry large files, such as movies, music, leading-edge games and photographs - as well as smart home capabilities, multimedia programming for distance learning, and telecommuting.

2. What are the advantages of X-FON ?

- Surf the Internet faster with no wait or lag time.
- Email large files such as family photos, now even family videos in seconds.
- Quick access to online shopping and banking, open 24 hours, with no lines, in the comfort of your own home.
- A modem is no longer needed to access the Internet so there is less clutter on your desk, less equipment to setup, and less to go wrong.
- Stream full length movies and free TV shows to your computer or TV. (Additional equipment needed for use with TV)

3. They installed fiber in my neighborhood recently. When will I be able to get X-FON service?

- Call us! We still may need to install the ONT and power supply to convert the light of **X-FON** into digital data for your computer and phone.
